

VOLUME XV.....NUMBER 253.

rock will receive fresh A.D. 1111 (1511) in the desirable and quality of 1800 is 194, and will be a good example of a good one.

The Great Trial!
We learn that there is to be a grand trial of the power of Fire Engines, Nos. 3 and 6 of this afternoon at two o'clock at the Foot of Thomas' Hill. There will be great works beyond a doubt, and a large number present to witness the power of these beautiful machines.

The Panorama.
Remember that this evening and to-morrow is the exhibition of the beautiful Panorama of the Hudson river. All who have not yet witnessed it, should improve the time.

The Old Burial Ground.
Mr. Editor—I perceive by your paper, that the subject of a removal of the remains at the lower Burial Ground, is about to be considered by the City Council.

Orators in America.
A handsome volume of four hundred and sixty-two pages, with the above title, has been laid open on our table by Mr. E. F. Duren, in behalf of the enterprising publisher.

William McKay, Esq., has been elected Judge of the Fifth Judicial District of Iowa, over Thomas Baker, Democrat. This is the district which should have included the Mormon County of Polk, but it was left out of any district in order to elect Baker.

The Phenological Journal announces, we are happy to say, that O. S. Fowler of New York, the best practical Phenologist in the Union, proposes to deliver a course of lectures in the city on Phenology and its applications and bearings, during the latter part of this month. Mr. F. may be sure of full houses here, and the attendance of many seekers of the science of which he treats.

The New Brunswick Head Quarters of the 25th ult. says that a plan is in contemplation for importing the navigation of the St. John river. The plan is to dam the mouth of the St. Francis and Fish rivers, above the Grand Falls, and by this means obtain an immense reserve of water which can be flowed into the St. John at any time when the river is too low for the purpose of steam navigation.

The Victrola Whig says that a short time before Geo. Taylor went to Washington, he was about to visit a place where the cholera was raging, and was reminded of the untimely death of General Harrison, when he quickly replied: "Oh, my goodness, no, goodness, gentlemen, Fillmore is not a Tyler!"

The Boston Journal states that with the exception of peaches the fruit buds about Massachusetts are numerous and look quite promising, especially peaches. Indeed the signs of a season favorable to all kinds of vegetation are auspicious. Asparagus is already beginning to show itself in the open air, gooseberry shrubs are fully leaved out, and apricots are in blossom—a few days will suffice to bring out other fruit blossoms in great profusion, and, notwithstanding the inclemency of the weather during the past month, nothing has yet occurred, beyond perhaps the decay of a few seeds prematurely sown, which is in the least alarming or unfavorable to the fruit, the horticultural or the farmer.

It will be seen on referring to our advertising columns that Dr. Aaron Young Jr. has engaged to take charge of the department of Natural Science in the Oxford Normal Institute, at South Paris, and will enter upon the duties of his office on the first Monday in June next.

Marlboro' Hotel, Boston, April 28.
Rev. Dr. Bow delivered an address, full of beautiful illustrations, on "Wednesday evening, before the Young Men's Society for Moral Improvement."

His object was to show that by the very laws of mind, there was a necessary influence growing out of every act and sentiment, which extended in ever widening circles, applying to the end of time, but as long as intelligent beings exist in a future state.

Nowhere could be found a human being, above this influence and none were so obscure or feeble as to be beneath the power of exerting it upon others, and of receiving impressions from others.

The influence of every human being, from his infancy, was crystallizing. From the infant that had just opened its eyes upon the light, there was going out an influence that affected the mother's heart, the mother's character, and it was also receiving impressions from her every look and from the tones of her voice, that would last while its soul existed.

A single sentence, a message received, a book loaned or given, and even a look, had, in those words of influence, changed the entire character of a life, and placed a man where he never would have been, but for that one simple circumstance.

Evil influences were not so easily checked, they were none the less powerful. They were more subtle, serpentine, and concealed, but the influence of one dissolute youth would live and widen the all eternity.

Evil influences were not so easily checked, they were none the less powerful. They were more subtle, serpentine, and concealed, but the influence of one dissolute youth would live and widen the all eternity.

At this moment (says the Courier), there are about that tariff of 10% which have brought ruin upon the country, but for the Mexican war and the famine in Ireland, and yet that tariff and the sub-tariff are the fruits of Mr. Walker's financial abilities! The loss of duties of the tariff of 10% would have produced an explosion similar to the Irish famine, and the market for some ten million of dollars would have been opened up.

FOR THE WHIG AND COURIER.

New York, May 3 P. M.
Montreal, May 3.—Since the issue of the address of the British party, calling upon the people to preserve order, no more note has been heard. The organization of the various boards for all purposes believed that no further dignity will be shown here.

The Ministry have sustained the defeat in the Legislative Council. During the last three days ministerial positions have been trying to get an address to the Governor, similar in its tone to that presented by the Assembly, but they have failed in their object to-day by a majority of only one.

The Richmond Enquirer claims the election of 12 Democrats and one Whig to Congress, leaving two districts to bear from.

A letter from Acapulco dated April 1st, mentions a rumor that a ship from Panama for Calcutta, filled with passengers, had been burned at sea and all except three or four had perished.

Indian accounts from Yucatan state that the Indians were beaten on all sides, but were victorious in fixed battles.

It is rumored that the following appointments have been made for the port of New York: Ex Mayor Brady, Collector; 44th Maxwell, Assistant Treasurer; John Young, Receiver; Hiram Fuller, Marshal.

The Tribune has three days later intelligence from California but there is no news of importance in these accounts.

A letter from Independence, Mo., states that there were 6000 immigrants on the frontier on their way to California.

A despatch from St. Louis states that 45 deaths from Cholera occurred during the last week.

The President has received a letter from Lady Franklin and has returned a favorable reply.
